EDUCATION

Sri Sairam Institute of Technology

Bachelor of Technology in Artificial Intelligence and Data Science

Chennai , TN

Sep. 2023 – May 2027

EXPERIENCE

AI & Application Development Intern

Jun. 2025 – Aug. 2025

BillionBright Solutions LLP — Paid Internship

Remote

- * Worked on real-time application development and integration of generative AI models into product workflows.
- * Developed and enhanced generative AI workflows using Stable Diffusion, LoRA, and Fooocus for application-specific use cases.
- * Worked on integrating, automating, and deploying AI model workflows toward production-ready applications.

PROJECTS

Info-i (VeriTrust Agent) | Python, Qdrant, FastAPI, LangGraph, RAG

Jan. 2026

- * Built a multimodal misinformation verification system that processes text, images, and audio using OCR/ASR and generates evidence-grounded verdicts through RAG.
- * Designed a Qdrant-based long-term memory and hybrid retrieval pipeline with agent orchestration, live web evidence retrieval, confidence-based human review, and traceable evidence.

SodhaneGPT – Crime Intelligence Platform | Python, Next.js, FastAPI, XGBoost, NetworkX

Jul. 2026

- * Built an AI-driven crime intelligence platform for the Karnataka State Police Datathon, transforming structured crime records into geospatial, behavioral, and predictive intelligence.
- * Engineered data and ML pipelines for CrimeDNA similarity matching, risk prediction, anomaly detection, graph-based criminal network analysis, and explainable intelligence APIs.

Hazard_Det – Road Intelligence System | Python, YOLOv8, OpenCV, RabbitMQ, Raspberry Pi

Nov. 2025

- * Built an edge-AI road intelligence system combining YOLOv8 hazard detection with GPS/IMU sensor fusion, CAN-bus vehicle telemetry, and privacy-preserving vision.
- * Designed an event-driven edge-to-cloud pipeline using Raspberry Pi and RabbitMQ/CloudAMQP to transmit structured hazard events for real-time geospatial analytics.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, C++

Web & Backend: React.js, Next.js, Node.js, FastAPI, REST APIs

AI & Data: PyTorch, YOLOv8, Scikit-learn, XGBoost, LangGraph, RAG, Pandas, NumPy

Databases & Systems: MySQL, Qdrant, FAISS, RabbitMQ, Redis

Developer Tools: Git, Docker, Linux, VS Code

ACHIEVEMENTS

- * Champion – SAMARTHA'25 National Hackathon — Winner, INR 1.5L
- * Solo Champion – NALSAR University AI Trading Challenge — Winner, INR 30K
- * National Finalist – Volkswagen Digital Solutions Hiring Hackathon
- * National Finalist – Bank of Baroda National Hackathon & IntelliSmart Hiring Hackathon
